	2013 Rm	2012 Rm
Liabilities: (Gain) / loss	0.992	3.228
Assets: Gain / (loss)	-	-

The municipality performed their first actuarial valuation on 30 June 2011. Thus there are no experience adjustment figures available on or before 30 June 2011 to fully comply with GRAP 25

The municipality makes monthly contributions for health care arrangements to the following medical aid schemes:

Bonitas;
LA Health
Samwumed; and
Keyhealth.

Key actuarial assumptions used:

i) **Rate of interest**

Discount rate	9.03%	7.84%
Health Care Cost Inflation Rate	7.97%	7.04%
Net Effective Discount Rate	0.98%	0.75%

The discount rate used is a composite of all government bonds and is calculated using a technique is known as "bootstrapping"

ii) **Mortality rates**

The PA 90 ultimate table, rated down by 1 year of age was used by the actuaries.

iii) **Normal retirement age**

It has been assumed that in-service members will retire at age 65, which then implicitly allows for expected rates of early and ill-health retirement.

3.3 Retirement funds

The Municipality requested detailed employee and pensioner information as well as information on the Municipality's share of the Pension and Retirement Funds' assets from the fund administrator. The fund administrator confirmed that assets of the Pension and Retirement Funds are not split per participating employer. Therefore, the Municipality is unable to determine the value of the plan assets as defined in the principles of GRAP 25.

As part of the Municipality's process to value the defined benefit liabilities, the Municipality requested pensioner data from the fund administrator. The fund administrator claim that the pensioner data to be confidential and were not willing to share the information with the Municipality. Without detailed pensioner data the Municipality was unable to calculate a reliable estimate of the accrued liability in respect of pensioners who qualify for a defined benefit pension.

Therefore, although both the Cape Joint Pension Fund and Cape Joint Retirement Fund are defined as defined benefit plans, it will be accounted for as defined contribution plans.

CAPE JOINT PENSION FUND

The contribution rate payable is 9% by members and 18% by Council. The last actuarial valuation performed for the year ended 30 June 2012 revealed that the fund is in an sound financial position with a funding level of 99.4% (30 June 2011 - 98.1%). Actuarial valuations also determined that there were a shortfall in the investment return for the 30 June 2011 financial year.

NOTES ON THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2013

FINANCIAL RISK MANAGEMENT (continued)

(c) Interest Rate Risk

As the municipality has significant interest-bearing liabilities, the entity's income and operating cash flows are substantially dependent on changes in market interest rates.

The municipality analyses its potential exposure to interest rate changes on a continuous basis. Different scenarios are simulated which include refinancing, renewal of current positions, alternative financing and hedging. Based on these scenarios, the entity calculates the impact that a change in interest rates will have on the surplus/deficit for the year. These scenarios are only simulated for liabilities which constitute the majority of interest bearing liabilities.

The municipality did not hedge against any interest rate risks during the current year.

The potential impact on the entity's surplus/deficit for the year due to changes in interest rates were as follow:

1% (2011 - 0.5%) Increase in interest rates	94 077	68 920
0.5% (2011 - 0.5%) Decrease in interest rates	(47 039)	(34 460)

(d) Credit Risk

Credit risk is the risk that a counter party to a financial or non-financial asset will fail to discharge an obligation and cause the municipality to incur a financial loss.

Credit risk consist mainly of cash deposits, cash equivalents, trade and other receivables and unpaid conditional grants and subsidies.

Trade and other debtors are disclosed net after provisions are made for impairment and bad debts. Trade debtors comprise of a large number of ratepayers, dispersed across different sectors and geographical areas. Ongoing credit evaluations are performed on the financial condition of these debtors. Credit risk pertaining to trade and other debtors is considered to be moderate due the diversified nature of debtors and immaterial nature of individual balances. In the case of consumer debtors the municipality effectively has the right to terminate services to customers but in practice this is difficult to apply. In the case of debtors whose accounts become in arrears, Council endeavours to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

All rates and services are payable within 30 days from invoice date. Refer to note 15 and 16 for all balances outstanding longer than 30 days. These balances represent all debtors at year end which defaulted on their credit terms.

FINANCIAL RISK MANAGEMENT (continued)

(e) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of committed credit facilities. Due to the dynamic nature of the underlying business, the treasury maintains flexibility in funding by maintaining availability under credit lines.

The entity's risk to liquidity is a result of the funds available to cover future commitments. The entity manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the entity's financial liabilities into relevant maturity groupings based on the remaining period at the financial year end to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.
